E 	Rear doors, centred on flat panel below the beltline	20" × 10"	Opaque white vinyl die-cut to rounded plate, UV laminate	2

INSTALLATION NOTES

- A and B must clear the Ford oval, the tailgate handle recess and the raised MAVERICK letters.** Vinyl will not lie flat over any of them. Centre each piece in the flat panel to its side of the oval.
- C sits in the band below the MAVERICK letters.** That band measures roughly 4.2" tall off a photo — please verify on the vehicle before cutting and tell us if the bar needs to come down to 3".
- D and E are centred on each door's flat area,** clear of the handle scoop and the lower body crease. Keep the top edge level with, or just below, the beltline trim. Match height left to right.
- A, B and C are white artwork only** — they are meant to read as lettering directly on the paint, with no visible background. **D and E are solid plates.**
- Artwork is supplied at exact size. **Please print at 100% — do not scale to fit.**
- Outdoor-rated vinyl with UV laminate throughout. Cast film preferred over calendared.
